Comment.

25X1A

The report continues and supplements another 1954 road bridge construction plan transmitted previously. . The following new information was obtained from the present report:

1. A total of approximately 32 million eastmarks is to be made available for the 1954 road bridge construction program as against 26.7 million eastmarks envisaged in the previous program.
2. The new program lists 48 bridge construction projects as against 20 in the previous program.
3. The money required for the more extensive road bridge construction program will be made available by an increase of the sum originally earmarked for the program involved and a drastic curtailment of allocations for some bridges already under construction, e.g. the Oder River bridges near Schwedt and Hohenwutzen.

It is believed that the new program will be subject to several modifications.
